

Project I: Game design

Rock Paper Scissors (Python)

Ironhack student:
Katarzyna Grzyb

Rock Paper Scissors (Python)

Objective

- Build a command-line game in Python

Rules

- Rock beats Scissors, Scissors beats Paper, Paper beats Rock
- Player competes against the computer
- First to **3 points** wins

Technical Design

Main concepts used

- Functions
- Loops
- Conditionals
- Dictionaries

Features

- Random module
- Score tracking
- Input validation
- Replay option

How it works

⚡ Challenges & Learnings

Challenges

- **Indentation**
- **Play again** feature
- **Input validation** (including shortcuts)
- Splitting the code into **functions** (correct execution order)

Learnings

- Basic **formatting**
- **Time lapse** function

Demo time

Thank you!

Katarzyna Grzyb
